Get yours for 20% off all month!

and to sweeten the pot-

all in-stock Sanitas products will be

10% off this month as well

April's Spotlight Product was picked by our very own amazing skincare specialist, Serissa Asta

Q: What do you love about this product?

A: I love the Brightening Peel Pads because I instantly feel them working, and they leave my skin glowing.

In our dry climate dead skin build-up happens easily, not only making our skin feel tight, dry, and dull, but also preventing our products from being absorbed. The brightening pads are a quick, easy, and effective

treatment to brighten and encourage skin renewal, as well as improving tone and texture.

Q: How do you recommend using them?

A: I personally use them 1-2 X per week, depending on how dull my complexion appears, or how tight it feels.

Sample skincare routine:

Morning- After cleansing, follow with Sanitas Vita C Serum and layer with Antioxidant Moisturizer. This is packed with vitamins C, E and D to aid in minimizing signs of aging, support collagen production, and protect against the elements. This combo leaves skin feeling deeply hydrated and looking luminous.

Evening- After cleansing, use a peel pad (as needed), followed by Sanitas Vita C serum. This is great for brightening, hydrating, and tightening, and can be layered under your night cream for extra nourishing.

Hot Tip:

Sanitas products are highly concentrated- a little goes a long way- cut brightening pads in half to get more use out of them, and keep a supply on your nightstand for those lazy nights
